Full-Stack Web Developer with a background in Sales and Customer Service, looking to pursue a career in web development. Experienced in both front-end (HTML5, CSS, Javascript, and JQuery) and back-end development (Node.js, MySQL, Sequelize, MongoDB, Firebase, Express, and React.js) as well as templating engines such as handlebars JS. Additionally, adept at working with computers and electronics.

EDUCATION:

George Washington University, Arlington, VA

July 2017-October 2017

GW Coding Bootcamp - An intensive 12 week long boot camp dedicated to designing and building full stack web applications. Skills learned consisted of HTML5, CSS3, Bootstrap, Javascript, JQuery, Firebase, Node JS, MySQL, Sequelize, MongoDB, Express, Handlebars.js, and React.js

APPLICATIONS BUILT:

CryptoTracker

- Web application that tracks the percent rate of change of any Bitcoin cryptocurrency, and displays the data on a graph using Canvas JS. Additional features include an auto updating ticker for the current value of Bitcoin, and a currency to Bitcoin converter.
- Worked on a team of three as the Lead Developer.
- <https://aqudsi.github.io/CryptoTracker/>

Link Inspector

- Node.js web application that allows the user to enter a Bit.ly link to see the fully resolved URL and whether or not the link is malicious. This app is paired with a Google Chrome extension that allows the user to hover over Bit.ly links in their browser to see where they lead, and whether or not they are malicious.
- Worked on a team of three as the Lead Back End Developer
